# New products that will make your pool projects respect nature

## Electronic pump control

- Integrates timer, motor guard and contractor functions.
- A single unit for pumps from 0.5 to 2 HP.
- Measurement of the pump's instant power consumption.
- Allows control of the filtration pump, salt chlorinator and lighting elements.
- Monochrome LCD graphic display.
- Intuitive user interface.
- Compact and easy to install (allows wall or DIN rail installation).
- Alarms for pump overload, dry running detection and protection, closed valve detection and automatic pump power detection.

## Bipolar production cell for salt chlorination equipment

- Attractive and functional design
- New "easy-lock" closing lid.
- Total visibility of the titanium plates status.
- Improved ergonomics of the cell connection cable.
- Domestic and professional range of 50 and 70 gr/h.

## Expansion of the Low Salt chlorinator range

Immerse yourself in innovation with the compact low salinity salt chlorinator salinity Touch LS!

You are probably already familiar with the current range of 15, 20 and 30 g/h salt chlorinators with a salt concentration of 1 to 2 g/l for private pools. Now, we are extending the range with new equipment for public pools with outputs of 50, 75 and 100 g/h.

## Touch Evo + range

New range of compact salt chlorinators for private pools, with productions from 15 to 35 gr/h, touch display and integrated domotic functions.

- Attractive design.
- Latest generation touch screen.
- Modification of pump speed via the chlorinator (in the case of pools equipped with variable speed pumps).
- Heat pump management.
- Possibility of solenoid valve management (some brands).
